

JOURNEY TOGETHER – FAMILIES, SCHOOLS AND COMMUNITIES.

EUROPEAN SCALE STRATEGICAL
PARTNERSHIP PROJECT BETWEEN
ESTONIA, ITALY, PORTUGAL,
DENMARK AND ROMANIA

THE AIM OF THE PROJECT

Journey Together is a partnership project between **Estonian, Italian, Romanian, Danish and Portuguese** schools. The purpose of the initiative is to increase the participation of students' families in certain school activities to improve the academic performance of children and promote a sense of belonging within the school community. The main emphasis is on increasing social inclusion. Erasmus+ programme enables to share experiences in a transnational environment

The main emphasis is on increasing social inclusion, as Europe faces a long-term migration exigency, but also large-scale emigration within the Union, which diminishes the overall quality of education. Problems in educational establishments arisen due to low social cohesion, such as early school leaving and insufficient expertise to enter the labour market, exist in all the countries of the Union and by virtue of this, the project will be advantageous for all the partners and other stakeholders.

Partners and participants come from countries of different geographical locations, history, culture and educational systems; however, they all share the same common concern of increasing cohesion among the members of their community, increase the feeling of belonging to the European Union and improving their teaching methods to cater for their diverse students.

Erasmus+

JOURNEY TOGETHER

OUR MISSION

- Educational and cultural experiences
- Increasing social solidarity
- Greater gender equality
- Prevention of absenteeism and early school leaving
- School-family understanding
- Participation of students and families within school life
- Greater communication between members of the educational community
- Enrichment of the "European Development Plan" of the participating schools

OUR VISION

The impact and expected long-term benefits relate to the acquisition of teaching skills to cooperate with the families of students to improve social inclusion and school performance, broadening the pedagogical and personal horizons of teachers through working alongside European colleagues and improvement of the social and civic competence of students through greater democratic participation.

The project will have four transnational meetings between project coordinators

The duration of the project is 2 years and will involve more than 25 activities

Evaluation and dissemination will take place throughout the project and your opinion will be considered

The project will contribute to the internationalization process of all the schools
